Dreamweaver, Microsoft Internet Information Server, Microsoft Visual Studio, Paint Shop Pro, Photoshop, SharePoint Portal Server, SQL Server, Windows Server

Languages:
ASP.net, Classic ASP, CSS, HTML, JavaScript, PHP, SQL, and VB.Net

Portfolio: beavermjr.info

EXPERIENCE

Roman Catholic Diocese of Albany, Albany, NY

Webmaster, February 2009 - Present
- Maintained first 3 versions of RCDA.org using **HTML, JavaScript, Classic ASP, Dreamweaver** and **Photoshop until 2018.**
- Created and maintaining 35 parish websites that are being revamped using an **HTML 5** mobile responsive **Bootstrap Template, PHP, SQL server, and JavaScript**
- Developed 32 **vb.net applications** using **Visual Studio** to store and retrieve data from a **SQL Server database.** These applications perform event registrations, data collection, and report generation. Used Microsoft Access front end to give office personnel access to the data. Migrated existing Access databases to SQL server for use in web applications.
- Created and maintain an Intranet site based upon **Microsoft SharePoint 2007, 2010 & Office 365.** Handled the migration from 2010 to cloud. Site collection consists of 21sites. Performed all aspects of site creation, branding, content setup, permissions.

General Electric Company, Schenectady, NY

Computer Programmer, April 2007 – August 2007 (contracted through Management Decision Inc.)
- Converted paper forms used on shop floor into web based data recording tool which included reports based upon provided data
- Code **HTML** and **ASP.net** using **Dreamweaver**
- Maintain PCs used by hourly workers on shop floor
- Stored data in Both an SQL Server and an Access database

Web Master, October 2001 – June 2005 (contracted through The Washington Group)
- Code **HTML** using **Dreamweaver**
- Creating **Cascading Style Sheets** using **TopStyle Lite**
- Develop and maintain **JSP/JDBC** applications using **Dreamweaver**
- Create **DOM compliant JavaScript** for **Netscape** and **Internet Explorer**
- Create Web images using **Paint Shop Pro**
- Upload web pages to production server using **Teamsite**
- Responsible for entire content and function of internal GE Facilities site. Used **HTML**, **JavaScript** and **JSP** to develop site content. Created forms, which allowed ordering of lunch online, registering of visitors and an information store for such things as safety shoes and glasses
- Supported development of visitor bagging system, which entailed interfacing between the users and company that developed the system. Also provided system development expertise during development and implementation of the system. Setup several PCs and a server then configured them to function as a client server system. Using a touch screen interface with an attached PC camera, users can generate a visitor's badge, which closely resembles an employee's badge
- Assisted during testing and implementation phase of Pocket PC software, which allowed security personnel to issue traffic violation notices as well as perform monthly fire extinguisher inspections
- Assisted in training campus personnel to use new security system

Michael V. Beaver Jr.

38 Miller Ave, Apt 2, Albany, NY 12203   **Tel: (518) 669-6005**   http://www.beavermjr.info/

Computing Infrastructure Team, Contract, July 1998 – May 2000 (contracted through Adecco)
- As part of the Computer Infrastructure Team, I utilized an **Access database** to manage the computing infrastructure for the Controls, Accessories, and System Engineering Division, which consisted of over 400 engineers and draftsmen
- Attended biweekly meetings to discuss computing issues with Engineering Business Systems, which supplied needed computing hardware
- Utilized **Norton's Ghost** to initialize PCs for deployment. Handled ordering and deployment of Hardware and software. Developed plans for daisy chaining the deployment of new PCs

Web Support Specialist, Contract, November 1997 - May 1998 (contracted through Adecco)
- Converted Word documents to web documents using HTML Transit
- Utilized an **Access database** to store data such as training session registration and audit findings for later retrieval
- Combined **Cold Fusion** and SQL to integrate an Access database with the web and provide the ability to search, store and retrieve information
- Incorporated HTML tables, frames, and forms with **Cold Fusion** in order to integrate database content with the web
- Developed web graphics utilizing **Paint Shop Pro** and Live Image

Computer Science Corporation, Rensselaer, NY

Web Developer, June 2005 – February 2007
- Code **HTML** and **ASP.net** using **Dreamweaver**
- Create Web images using **Paint Shop Pro** and **Photoshop**
- **Source versioning control** through the use of **Merant Version Manager**
- Web source promotion through **Lotus Notes** with the use of **Merant Version Manager**
- Handle all code changes for the HIPAADESK portion of eMedNY.org
- Developed eMedNY Newsletter's web based registration and distribution system
- Used an **access database** to store eMedNY Newsletter registration information
- Redesigned **NYHIPAADESK.com** to make the site more user friendly and easier to navigate

Conversion Services International, East Hanover, NJ

Web Developer, June 2000 – November 2000

- Worked as part of a team on a long-term web development project called SchoolKidsOnline.com This site was to be an educational, cartoon style site, that taught reading, math and spelling
- Extracted data from an access database using **Cold Fusion** and incorporated it into **Flash animations** using **Generator templates**. This provided **flash animations** the ability to respond to a student's progress and modify the lessons accordingly
- Utilized **HTML** within **Cold Fusion** templates, which were used by **Generator templates** to create content for Flash animations
- Generated the how to coding (**Flash Action Scripting**), which recorded user activity within the flash animations and returned it to the database
- Provided support for a client's web site. Updated page layout and content using **HTML** and **JavaScript**

EDUCATION

Bachelor of Science Degree Computer Information Systems, Minor in Business
The College of Saint Rose – Albany, NY, May 2000
